

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A computer system for storing and retrieving data including default preference data records, comprising:

a memory configured to store an identifier including three or more variables for identifying each of said default preference data records stored in said computer system, wherein one of said at least three variables is a physical location variable relating to a physical location of at least one device other than in a said computer system, and a further one of said at least three variables is filled by being suitable for use as a wildcard used as an identifier and in setting said default preferences; and

communication means for communicating at least one of said default preference data records to said at least one device.

2. (Original) The system of claim 1, wherein one of said three or more variables is a device identification variable.

3. (Original) The system of claim 2, further includes a timestamp for prioritizing said data.

4. (Canceled)

5. (Original) The system of claim 4, wherein said system includes a registry for storing said data.

6. (Original) The system of claim 5, wherein said registry is provided in a database structure.

7. (Original) The system of claim 1, wherein said three or more variables includes a device identification variable, an application identification variable and a user identification variable.

8. (Original) The system of claim 7, further including a timestamp for prioritizing data.

9. (Canceled)

10. (Currently Amended) The system of claim ~~[[9]]~~ 1, wherein said system includes a registry and said registry includes a database structure for storing said data.

11. (Currently Amended) A computer registry for storing and retrieving preference data, comprising:

an identifier including at least three variables for identifying data stored in said computer registry, wherein one of said at least three or more variables is a physical location variable relating to a physical location of at least one device other than ~~[[in]]~~ a computer in which said

registry is stored, and wherein the data stored in said computer registry includes preference data ~~comprising a combination of an identifier and a value; and~~

a data record including said identifier an associated default parameters for said at least one device.

12. (Original) The registry of claim 11, further comprising a means for providing a floating value to said at least three variables.

13. (Previously Presented) The registry of claim 12, further comprising a means for associating a time stamp to said data.

14. (Currently Amended) A method for storing and retrieving data in a computer system including a computer registry, comprising the steps of:

identifying each stored default preference data record in said computer system by an identifier including three or more variables, wherein one of said at least three or more variables is a physical location variable relating to a physical location of at least one device other than ~~in a~~ said computer[[;]] system; and

filling one of said variables with a wildcard for enabling default settings to be set for (i) users not listed in the computer registry and (ii) for users listed in the registry but having no preferences.

15. (Original) A method according to claim 14, further comprising the step of storing data in a registry.

16. (Original) A method according to claim 15, wherein one of said three or more variables is a device identification variable.

17. (Original) A method according to claim 16, further including the step of time stamping said data for prioritizing said data.

18. (Canceled)

19. (Currently Amended) A method according to claim ~~[[18]]~~ 14, further including the step of deleting one or more data items that has been superseded by a subsequent data having same identifier but a higher time stamp value.

20. (Original) A method according to claim 19, wherein said registry is provided in a database structure.

21. (Currently Amended) ~~[[A]] The system for storing and retrieving data as in~~ claim 1,
further comprising: wherein said location comprised the
a locating a device.

22. (Canceled)

23. (Canceled)

24. (Canceled)

25. (Previously Presented) The registry of claim 12, further comprising means for deleting one or more data items that has been superseded by a subsequent data having a same identifier but a higher time stamp value.
